Art Unit: 3673

Drawings of better quality, possibly formal drawings, must be provided.

Numeral 71 is confusingly used on pages 9, 10 and figure 4 to identify what may different elements. Numeral 63 is confusingly used on page 10, lines 4 and 8.

Correction is required.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what exactly are the structural elements of the claims. What is the "lower skirt" of line 13 of claim 2. In claim 6, line 1, "claim" must be changed to -claim-.

In response to this action applicant is urged to identify each and every element of the claims with references to the drawings, with numerals in parentheses. Such numerals will aid in more easily "following" the claims and will help in avoiding "mistakes" but will not in any way limit the scopes of the claims.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Vail or Bondy et al.
